## TWO GENTLEMEN OF VERONA--TICKET INFO

Faculty members or individuals who wish to purchase tickets for Two Gentlemen of Verona, now playing at the Folger Shakespearean Theatre, should ask for the "interpreted" performance when calling the box office. All of the evening performances have been sold out with the exception of the January 19th interpreted performance, where a block of seats are being held for Gallaudet and the deaf community. If you do not specify the "interpreted" performance they will probably inform you that the show is sold out. These seats will go on sale to the general public on January 5, 1978.

## ENERGY CONSERVATION

"The big consumers of electric energy in your home are the appliances that produce heat and cold. Your home heating and cooling system, water heater, range and oven, refrigerator and freezer can account for three-fourths or more of your home energy use."

"All the energy used in a year's time by your electric clock, heating pad, hair dryer, blender, tooth brush, sun lamp, waffle iron, sewing machine, radio and vacuum cleaner does not even amount to one-twentieth of the electricity used by an electric water heater in the same year." (National averages compiled by Edison Electric Institute)."

## TTY TAX HELP ON FEDERAL INCOME TAXES FROM IRS
